

Thank you for contacting us here at Levetec.

We are ready to help you to find the information and products that you need for your grinding and polishing business.

Providing stability, durability, and ease of handling, our ScanMaskin line of grinding and polishing machines have been engineered to perform at high speeds, allow for heavier weight to be placed on the machine, and to provide an even grind from start to finish.

Constructed of steel to meet the demanding nature of most grinding and polishing projects, our patented operating system helps maintain stability even during the most arduous jobs.

Moreover, radio controls allow for easy machine maneuvering and handling, and provides for a safer user experience.

Our ScanMaskin line comes in floor coverage sizes from 13" to 40".
